Longacre[®]

Hitch Guard Shin & Knee protector

Longacre Racing Products, Inc
Monroe, WA www.longacreracing.com

Install **Hitch Guard** over your hitch and push it as far back as it will go. Secure with the wire ties included - you can use 1 or 2. Pull the wire ties tight enough to indent the foam about 1/8". Cut off the excess tie.

If you are concerned about theft use some adhesive on the hitch along with the ties.

The **Hitch Guard** should not interfere with any normal towing functions. To be sure have someone walk alongside the trailer briefly.
