Our new app designed to provide you with all the essential information on chassis setups in a user-friendly layout, now available on iOS for iPhones and iPads. When used in conjunction with our state-of-the-art Elite and/or Elite Pro wireless pads, Longacre Connect gives you unparalleled insights into your racing setup, all displayed on a vibrant full-color HD screen.

Statement of Accuracy: Longacre Elite & Elite Pro scale systems are designed with accuracy of 0.1% of applied weight or ± 1 graduation, whichever is greater. Longacre designs systems exceeding 1800lb capacity (per pad) with accuracy of 0.25% of applied weight or ± 1 graduation, whichever is greater. Longacre certifies every set of scales is thoroughly tested, inspected, and found to meet or exceed the published specifications at the time of shipment from the factory at 977 Hyrock Blvd., Boonville, IN 47601. Longacre scales are not designed for, certified for, or recommended for use with any manned aircraft.

Warranty Statement: Longacre Elite & Elite Pro scale systems are warranted to be free from defects due to materials and workmanship for a period of 2 years from the date of purchase. This warranty does not cover damage due to misuse, negligent handling, accident, or damage by fire, water, or uncontrollable forces of nature.

NEW WIRED

- Longacre's most feature-packed, wired scale system to date! All Elite wired scales now include Bluetooth 5.0 connectivity for 2025 providing a hybrid user experience in a traditional wired-scale package.
- Elite scales function as a standalone wired scale system that can also be used as a powerful, wireless racing setup tool.
- Effortlessly connect your scales to your preferred Android or iOS device with a simplified, but secure, pairing process.
- Control box display shows all 4 wheel weights, cross weight, and partial percentages/weights. A single memory session can be saved for quick retrieval through the control box display.
- Optionally pair with the Longacre Connect app to expand the capabilities of the Elite system. Taking measurements with wired scales has never been more efficient and convenient.
- View live weight and saved data simultaneously on the main, user-configurable screen including corner weights and partial percentages.
- Benefit from additional note-taking, organization, ride-height, and alignment pages.
- Extended memory capacity saves all setup data and allows effortless data export through email or file-sharing using the wireless device.

INTRODUCING LONGACRE CONNECT - THE NEW MOBILE APP FROM LONGACRE

Longacre Connect, the new user-friendly mobile app from Longacre, is now available on iOS and Android. When used in conjunction with our state-of-the-art Elite or Elite Pro Scales, Longacre Connect gives you unparalleled insights into your racing setup.

COMPREHENSIVE WHEEL WEIGHT DISPLAY

Longacre Connect allows you to view the four-wheel weights and all partial percentages simultaneously. Whether you require a specific combination of partial percentages or prefer to view them all, this app fits your needs.

CONVENIENT SETUP STORAGE

With the new Longacre Connect app, there is NO limit to the number of stored setups! Compare the memory weights with the current weights, ensuring you have the data you need for optimal performance.

SEAMLESS DATA MANAGEMENT

Longacre Connect allows you to save your memory and notes as a .csv file, enabling easy download and sharing. Effortlessly analyze and track your setups, ensuring you have a comprehensive record of the changes and results.

CUSTOMIZABLE CAR ICONS

Personalize your experience by selecting a car icon that corresponds to your racing application. Longacre Connect offers a range of options, including circle track, road race/Indy car, modified, kart, and even the ability to use a picture of your car as the icon.

EFFORTLESS SETUP

To weigh your car, simply turn on the scale pads and launch the app. Batteries are included and pre-installed, ensuring a hassle-free experience. The Longacre Connect system is self-contained and requires no additional control boxes or tablet/smartphone modules. The wireless signal connects the pads directly to the tablet/phone, eliminating the need for extra equipment.

DEMO MODE

Curious about the app's features? Longacre Connect offers a demo mode that allows you to explore its capabilities without purchasing the full-scale system.

DEVICE COMPATIBILITY

Longacre Connect is optimized for all current iOS and Android devices. We continuously optimize and test the app on alternate devices to ensure the best possible user experience.

EASY PAIRING

We have simplified the pairing process. Simply pair the LF pad with your tablet or smartphone; it's a seamless and user-friendly setup procedure. The process is easy yet remains secure without requiring any "secret codes".

COMPREHENSIVE NOTE-TAKING

Longacre Connect allows you to take detailed notes directly on your tablet or phone, effortlessly linked to the active save. Keep a permanent record of the changes you've made and the results you've achieved. Type notes using the on-screen keyboard or take them by voice, ensuring flexibility and convenience. Add photos of your setup to remember settings, track conditions, and more. With virtually unlimited space available, you can add, edit, or delete notes as needed, recalling them anytime.

EXTENSIVE DATA MANAGEMENT OPTIONS

In addition to note-taking, Longacre Connect allows you to store race notes and chassis setup data, including caster/camber, spring rates, tire pressures, and more. Create a customized template that captures all the information you need, and easily fills in the blanks for each race. The app acts as a comprehensive repository for all your setup and race-related data.

MULTIPLE DEVICE PAIRING

Securely pair as many devices to the scales as you wish and the system will connect to the first available device. This feature allows the user flexibility to choose the most conveniently available device at the time. Only one connected device will operate the scales at a time.

STORAGE BOXES FOR 15" & 12" LOW PROFILE PADS

SIDESLIDER FOR BIND-FREE SETUPS

CHASSIS ROLLER SLIP PLATE

You use ball bearing A frame pivots, low friction ball joints, greaseable Heim joints, and even ceramic bearings all to eliminate suspension friction. Don't set up your car with even a small bind at the scale pads.

See how the LF pad slides sideways, relieving camber bind.

Spacers included to level the other 3 pads.

When you lift your car to put it on scales the front wheels camber in at the bottom. As you let it down the wheels must be allowed to freely camber back out or there will be a small residual bind in the chassis. This will make your wheel weights (and your setups) less than perfect. To avoid this, the front wheels must be able to easily move sideways. With SideSliders your front wheels can move sideways effortlessly to relieve any camber-induced bind. This will assure you the most accurate, consistent setups possible.

- Rollers are made from a tough, low-friction polymer.
- Install under Left Front wheel (it has the most camber change.)
- 3 Spacers are included to re-level your setup.
- Use on any smooth floor surface.

| DESCRIPTION | PART # | PRICE |
|--|----------|----------|
| Economy SideSlider Single with 3 Spacers | 52-72870 | \$151.99 |
| Economy SideSlider Set with 2 Spacers | 52-72872 | \$217.99 |

BILLET ALUMINUM MODULAR SETUP PLATEN

BEST RIGIDITY FOR ACCURATE SETUPS

EASY TO ASSEMBLE. EASY TO TRANSPORT.

The entire Platen is leveled, not just the scale pads as with hi-density foam racks. Modular components assemble quickly, then break down for efficient transportation.

- Four Billet Scale Pad Levelers with pop-out feet (24 total.)
- Two adjustable spanners.
- Two ramps.
- Two horizontal locator bars.
- Billet T6 aluminum scale pad levelers with a full floor for the best rigidity and the most accurate setups.
- Swivel-adjusting feet pop out for quick and easy storage.
- Spanners are attached to levelers and are flush with the top of scale pad.
- For 15" x 15" x 2.5" scale pads, wired or wireless.
- Fully adjustable for wheelbase (90" – 110") and track width.

ASSEMBLES IN 15 MINUTES OR LESS AND DISASSEMBLES EVEN QUICKER.

◀ **OPTIONAL VERSION: SideSliders** allow the pads to float effortlessly sideways to relieve any chassis bind caused by camber change. Great for IRS cars.

LASER CHASSIS HEIGHT CHECKER & LASER LEVEL

- Check actual chassis height when the car is on scales or on a leveler. Don't get your setup 'just right' only to find out the car is too low or too high once you get it back on the ground.
- Includes an easy to setup self-leveling beam laser, 4 easy to read targets that are held to the frame with magnets, and a separate pad leveling target for leveling the scale pads and establishing the 'ground plane' to measure chassis heights.

| DESCRIPTION | PART # | PRICE |
|--------------------|----------|----------|
| 2" to 6" Range | 52-72983 | \$373.99 |
| 2" to 8" Dirt Cars | 52-72985 | \$373.99 |

Imperial &
Metric Readout.

CHASSIS HEIGHT CHECKER

- With the car on the ground, it measures chassis height directly, accurate to .0625".
- With the car on scale pads, it measures from top of pads to frame directly (no subtracting needed.)
- Measures chassis height dynamically, as you work on car. Magnet holds tape to frame. Indicator shows height as car moves up and down. Use set of 4 to quickly see height at all 4 corners.
- 2 Lengths – 24" for perimeter frames, 36" for straight rail cars on right side.
- Measures height from 2"-10" on 24" and 2"-15" on 36".

| DESCRIPTION | PART # | PRICE |

or when car is not
on scales.

MINI CHASSIS HEIGHT CHECKER

Great for quick, accurate checks of chassis height. Push it under the car, raise the tape with the knob, pull it out, and read the height. Range is 2"-8", accurate to .0625". This is a shortened and simplified version of the Chassis Height Checker above. Quick, accurate, and easy-to-use. It's a great replacement for 'step' type tools, more accurate, more versatile, and easier to use.

Billet Magnetic adapter now with 8 premium "Rare Earth" magnets for a stronger pull. Installed from the back for protection. Flush face and easy to clean.

Easily removes from gauge and can be used for other measurements such as spoiler and A frame angles, suspension, driveline, etc.

Great for bump stop cars with high LF camber. Reads as high as you need.

Comes with hard case.

DIGITAL CASTER/CAMBER GAUGE ACCULEVEL™ & QUICKSET™ ADAPTER

This is the fastest way to check your front-end alignment, just hold it against the rim for easy, accurate readings. No spindle adapters are required. Made from CNC machined billet aluminum. Works on most race cars, up to a 17" wheel. Three-point design squares up to your wheel and folds up for easy storage. Uses most caster/camber gauges. Billet aluminum is fully CNC machined. Rigid for accurate readings Three-leg design squares gauge to your wheel.

- Billet aluminum fully CNC machined. Rigid for accurate readings. 3-Leg design squares gauge to your wheel.
- Comes with a hard case.
- Reads to 0.1°.
- Will work on most cars.
- AccuLevel™ digital readout can be easily removed and used for other angle measurements on the car.
- Can compensate for unlevel ground and more accurate readings.
- Just hold it against the rim to take a measurement, no adapter needed.
- Digital C/C gauge with AccuLevel™ and QuickSet™ adapter with case and reads to 0.1° camber.
- For wheels 12" to 17".

TOE-IN BAR

Similar to our 52-79620 Toe-In Gauge, but this new model measures to the outside of the tire. No scribe line needed. Reads toe to 1/16". Can be done by one person. Billet aluminum. Adjustable up to 88" in width. Great for wide-track cars, Corvettes, etc.

| DESCRIPTION | PART # | PRICE |
|-------------|----------|----------|
| Toe-In Bar | 52-79622 | \$430.99 |

Use a
Toe-In Gauge
with a
Billet Tire Scribe

TOE-IN GAUGE

To get a very accurate toe-in measurement, jack up the front wheels and scribe a true running line on the face of the tire. (See Billet Tire Scribe.) Place the gauge in front of the tires and align the pointers with the scribe lines. Then, move the gauge to the rear of the tires and align the fixed end with the scribe line. On the other end, loosen the thumb screws and move the slider until the pointer aligns with the other line. Now read the exact toe-in on the scale. An accurate way to measure toe-in to within 1/16".

| DESCRIPTION | PART # | PRICE |
|--------------|----------|----------|
| Toe-In Gauge | 52-79620 | \$134.99 |

BILLET TIRE SCRIBE

The most important decision when choosing an analog air gauge is to get a gauge that works within the pressure range of the tires that you will be using the gauge on. For example, if you run 30 psi in your tires then you should get a 60 psi gauge. If you run 15 psi then you should get a 30 psi gauge. Tire pressure gauges work best in the middle of their range. All Longacre tire gauge models come in a variety of pressure ranges to help you get the most accurate gauge for your application.

DELUXE MEMORY TIRE PYROMETER

- Displays all 12 tire temperatures at the same time.
- Memory stores 10 complete sets of temperatures.
- Computes tire temperature averages.
- Built-in 4-car 70-lap Memory Stopwatch with interval timing.
- Electronics stabilize readings for consistent results.
- Takes temperatures in any order.
- Carrying case & adjustable probe included.
- Back light.
- Uses a 9-volt battery (included).
- Interval Timing: In addition to our 4-car built-in stopwatch function, you can now get overall lap times plus 3 different segments within that lap.
- Adjustable probe depth.
- Metric Option: Factory switchable to read in °F or °C.
- Standard version comes without averaging, stopwatch, or backlight, and has non-adjustable tip probe.

STANDARD MEMORY TIRE PYROMETER

- Shows three temperatures per tire and up to twelve temperatures at once.
- Contains a replaceable probe and padded carrying case.
- Backlit display ensures easy reading in all light conditions.
- Standard or Metric option

SPORTSMAN™ ELITE GAUGES & PANELS

Sportsman Elite Gauges take the traditional Sportsman gauge to the next level by incorporating our trusted SMi™ technology into this new mechanical gauge. This gauge eliminates the need for external warning lights, allowing for less extra wiring and maintenance. The new Sportsman Elite Gauges come with warning lights built in for added convenience. Once the gauge reaches the warning desired by the sending unit, the gauge changes to the correct warning color. The gauge has a bright white background with a red needle that makes it extremely easy to read. This new gauge is legal in all forms of motorsports and classes. **Gauges require warning sensors sold separately. Pressure gauges require a gauge line kit sold separately.**

NEW ELITE DIGITAL SHOCK INFLATION TOOL

Introducing the new Elite Digital Shock Inflation Tool from Longacre - a precision tool designed to simplify and enhance shock inflation for any car. Engineered with a dual pivoting head, it effortlessly adapts to any angle, allowing you to access hard-to-reach areas with ease. The tool features a low-flow pressure relief button, enabling fine-tuned adjustments in gas pressure without the risk of overshooting, so you can make minor tweaks confidently. Its digital gauge eliminates guesswork, providing accurate readings to ensure optimal performance. Packaged in a durable protective case, this tool is ready for travel and on-the-go use, fitting any standard Schrader valve for wide compatibility and convenience.

- Dual Pivoting Head: Easily accessible in tight spaces.
- Low-Flow Pressure Relief Button: Makes precise gas pressure adjustments simple.
- Digital Gauge: Ensures accuracy, reducing uncertainty.
- Protective Case: Perfect for travel and rugged use.
- Universal Compatibility: Fits all standard Schrader valves.

All hubs and spuds include a second safety groove for your protection.

STEERING WHEEL QUICK DISCONNECT SPLINED

Any play in the steering, including the hub, takes away control from the driver, letting the car 'wander around'. This Pro hub has a precision machined 4130 spud and a T6 Hard Anodized splined hub for a super tight fit, yet is easy to remove and install. Plus, there are multiple sets of mounting holes so you can 'clock' your wheel 3 times closer. For safety, there are 2 sets of retaining grooves. If you don't get the ring engaged, it will catch on the second safety groove rather than come off on the track. The steel spuds can be installed on either 3/4" or 5/8" shafts. Splined hub – pull ring release with double safety grooves on weld-on SAE 4130 spud.

94 SERIES

\$379⁹⁹

We identified a strong demand in the Stock Car, Sport Mod, and B-Mod shock tuner market for a specialized base valve non-bulb shock, leading to the development of a tuner-friendly shock with a removable base valve for easier customization. Our internal base valve design improves overall feel and grip by allowing lower gas pressure, and the shock is fully legal across all sanctioning bodies. With customizable valving options, piston choices, a 9" stroke shock for left rears, and a 1/2" diameter shaft for enhanced driver feedback, this shock absorber is tailored for top-tier performance.

THE COMPETITIVE EDGE YOU'VE BEEN LOOKING FOR

Engineered for GM A/G Body Style cars, the 81 Series shocks feature a convenient stock mount option and are fully compliant with IMCA and other sanctioning body regulations. The large body front shocks are designed specifically for Southern Sport Mod, Hobby Stock, and Street Stock cars, offering superior performance with a 44mm piston that reduces fade and minimizes heat buildup. With multiple piston options available, you can fine-tune your valving for maximum performance. The shorter front shocks allow you to lower the car's front end for improved stability and control, while the 21" extended-length rear shocks enhance handling and forward bite, giving you the competitive edge you need. Reach out to a sales representative to discover how the 81 Series shocks can elevate your car's performance.
